

## Final project presentation guidelines

Kindly note that you are expected to prepare **well formatted** presentations slides to guide you present your analysed, designed, developed, tested and debugged system. Your prepared slides should have the following sections:-

1. Cover page slide: documenting your details, project title and the project supervisor.
2. Introduction
3. Background
4. Problem statement
5. Aims and objectives:
  - (i) Main objective
  - (ii) Specific objectives
6. Literature review
7. Significance of the study
8. Screen shoots of the developed system e.g. Login screen, screen shoots of the system forms, screen shots of the system outputs such as reports, invoices, transaction receipts etc.

**Note:** You will be penalized for copying and pasting your proposal slides putting in mind that you have already proposed, analysed, designed and developed the system.

-The submission of your finally complied dissertation report will be done after the final presentations.
